WASHERS & SEALING RINGS

Washers and sealing rings for snap fasteners and eyelets

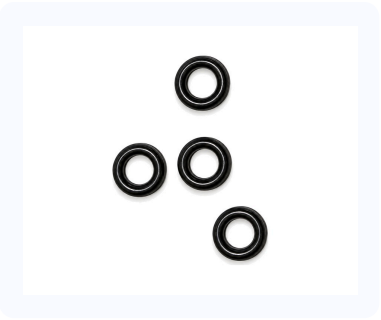

Why washers?

1. **Prevent tearing out**
   They spread the pressure over a larger area so that eyelets or snap fasteners do not tear out of fabric, leather or imitation leather so easily.
2. **Protect the material**
   Especially with thin, soft or delicate materials, they prevent the metal parts from pressing too hard into the material.
3. **Improve the hold**
   Eyelets and snap fasteners sit more firmly and wobble less.

When to use sealing rings?

1. **Watertightness**
   They prevent water from penetrating through the opening around the eyelet or snap fastener.
2. **Protection against moisture**
   They reduce the risk of moisture getting between the metal and the material.
3. **Pressure distribution**
   They distribute the setting pressure and give the material extra protection.

TURN FASTENERS

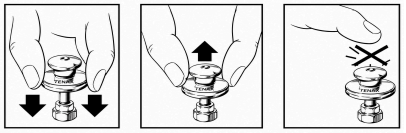

Turn buttons and Tenax buttons for boats, tarpaulins and hoods

Robust fasteners for outdoor tarpaulins and covers – turn-button fasteners with oval eyelets as well as Tenax buttons with matching screw-on lower parts.

The Tenax button

The Tenax button holds covers securely in place and can still be released with one hand.

1. **Open**
   Press the ring downwards with two fingers.
2. **Pull off**
   At the same time, pull the upper part upwards.
3. **Do not pull on the head**
   The fastener only opens via the ring – do not pull or press on the button head.

Item O-G 2182

Turn button with bracket, screw-on

T 32×12 mm · H 15,5 mm

Item O-O 1171 / R 1171

Oval eyelet with counter washer
